

Why choose us

- ▶ 19 years of admirable Experience
- ▶ Cost-effective solutions
- ▶ In-Time Delivery
- ▶ Zero percent defect
- ▶ Full Indemnity on what you are paying for
- ▶ Confidentiality of business
- ▶ Tailored course of action
- ▶ 100% Satisfaction

Services We Provide

- 
- ▶ Machining
 - ▶ Turning
 - ▶ Milling
 - ▶ Drilling
 - ▶ Grinding
 - ▶ Boring
 - ▶ MIM (Metal injection moulding)
 - ▶ Forged Metal Parts
 - ▶ Assembly
 - ▶ Finishing

Electrical & Electronics

MITAL ENGINEERING
MFRS.OF:ALL TYPE OF BRASS, S.S, ALUMINIUM,
COPPER COMPONENTS

Large scale production of parts for electronic and consumer products are manufactured on our cost efficient machines. Consistent production is Ensured by on-going statistical analysis of critical dimensions and tolerances. Electrical and Electronics Industries do require very small and precise Connecting parts in large volumes/ batches. Moreover, in electrical and electronic appliances every discreet assembly is connected by Precision Turned Parts.

MITAL ENGINEERING

Electrical & Electronics

MITAL ENGINEERING
MFRS.OF:ALL TYPE OF BRASS, S.S, ALUMINIUM,
COPPER COMPONENTS

Application: Precision turned parts for Plugs and switches, Connectors for fibre optics, Socket housing, Instrumentation, Terminal Blocks, Cable accessories and many more applications

Automobile Parts

Mital Engineering has successfully supplied precision turned parts for the automotive industry for many years. With our multi-axis CNC Machines we achieve a maximum of efficiency in the production of high precision complex components. Due to our extensive range of machinery we can meet your high capacity requirements.

MITAL ENGINEERING

Automobile Parts

MITAL ENGINEERING
MFRS.OF:ALL TYPE OF BRASS, S.S, ALUMINIUM,
COPPER COMPONENTS

Application: Precision turned parts for Engine System, Fuel systems, Air conditioning systems, Steering Systems, Switches, Electrical drives for Windows and seat adjustment and many other applications.

Threaded Inserts

We are manufacturer of threaded insert for plastics. We offer a full line of brass inserts for all methods of installation, including: ultrasonic , heat, Thermal ,press -in and mold -in. We can also custom design and produce threaded inserts for most applications as per requirement.

Products: Tapered threaded inserts, symmetrical threaded inserts, Threaded Press-in inserts, Threaded Expansion Inserts, Mold -in Blind Threaded Inserts, Mold-in Closed-end Inserts, Mold - in Thru-Thread Insert, Insert with Collar head, Press in Insert, Ultrasonic Collar Inserts, Conical Inserts with Dual knurland and many more.

Sanitary Fittings

MITAL ENGINEERING
MFRS.OF:ALL TYPE OF BRASS, S.S, ALUMINIUM,
COPPER COMPONENTS

Our production units are custom designed to ensure the highest degree in manufacturing flexibility. We are able to satisfy the markets diverse Production demands, while achieving superior quality at very high capacity outputs. We pride ourselves in our close cooperation with our customers. Our relationship is based on a common focus to make our customers' products the best possible.

Products: Tee, Elbow, Extension Nipple, Waste Coupling, Bushing, Water filter Nozzle, Faucet cartridge and mounting accessories, Diverter Valves and Many More.

The current generation of our CNC machines produces complex high precision turned components in large volumes. Our quality systems are capable Of providing complete SPC documentation, lot control and traceability to meet your exacting requirements. Your parts are inspected with the latest in advanced measuring systems including vision, vision with contact probe and microscope inspection tools.

Application: Hydraulics, pneumatics, industrial equipment, Telecommunications, Fibre Optics and many more.

COPPER COMPONENTS

MITAL ENGINEERING

Additional Services

Your orders are produced on state-of-the art machines that provide maximum flexibility and Productivity. Automatic machines are used for cost effective high volume production. If a Components design complexity requires additional machining, our secondary operations Department has a wide range of specialized machines to complete the process. Surface Treatments are also provided efficiently as below:

Surface Treatments

- ▶ Nickel
- ▶ Tin
- ▶ Silver
- ▶ Gold
- ▶ Copper
- ▶ Chrome
- ▶ Zinc including passivate plating
- ▶ Black oxide
- ▶ Specialty treatments upon request

Our technical team provides efficient and professional support from the earliest stages of Product developments all the way through final delivery. Custom precision part are Supplied complete and, upon request, ready for installation into your product.

Precision Turned Part

- ▶ Diameter ranging Dia 1 mm to 250 mm & Length 1 mm to 600 mm
- ▶ Tolerances on Dia ± 0.001 & ± 0.005
- ▶ Wide range of materials such as brass – Specialist, Stainless Steel, Steel, Copper alloys, Aluminium, Bronze, Gunmetal.
- ▶ Lot sizes from 500 Pieces to millions

Quality including & mfg facilities

We are committed to superiority. The combination of advanced Manufacturing echnology, state-of-the art measuring equipment, and many years of Experience promise you superior product value. All of this is accomplished while meeting the terms with today's stringent regulations:

- ▶ We take note of quality & design and develop the precision machined parts as per customers' design.
- ▶ We provide the necessary training to analyze right from the processing till dispatch of goods.
- ▶ We do undertake in process and intercrosss inspections.
- ▶ We care for the equipment's calibration and their safeguarding.
- ▶ We persist in regular records of quality standards,i.e.100% Visual Inspection to ensure 100% defect free products.

Production Machines

- ▶ CNC Machining Centers
- ▶ CNC Turn mill
- ▶ Automatic Turning Machine
- ▶ Manual Turning Machine
- ▶ Auto/Manual Threading & Milling Machine
- ▶ Drilling Machine
- ▶ Tapper Machine, Punching Machine

About Us

MITAL
ENGINEERING
Plot No : 54/3

MITAL ENGINEERING is Jamnagar India based Family Owned Company in the field of Manufacturing Metal Components. At Mital Engineering we manufacture and export Precision Brass Metal Components used for Electrical, Electronic, Fastening Fixtures, Building Construction, Automotive, Aerospace, Telecommunication and Network, Agriculture, Automobile, Pneumatic, Hydraulic and any type of fitting components as per specifications Customers Specification.
